

# Blank Track Game

How to make your own track game

## How to setup the board

- Fill in the spaces with either sounds, words, numbers, sums, or other things you want to learn
- Find a die
- Each player needs a counter.
- Put all the counters on start.

## How to play

- Roll the die and move forward that number of spaces.
- If the player can name the sound/number/fact on the space they can stay there. If not they go back to where they were.
- If you land on an instruction square you have to do what it says.
- First person to get to the "finish" wins.

### Options

- You could draw in a bridge/shortcut so that players who land on the start of the bridge can cut across the track.
- You could say that players have to roll exactly the right number to land on "finish".
- You could create your own game on the inside of cardboard boxes or using chalk in your garden.
